

“The future-ready district

will not be the one that gives students the most technology,

nor the one that removes technology from learning altogether.

It will be the district that teaches students **when** technology deepens learning; **when** it distracts from it; and **how** to remain **focused, ethical, creative,**
and **fully human.**”

Elizabeth A. Radday, Thomas Scarice,
and Matt Mervis, p. 32
